ERASMUS + EDUTRAINING DIGITAL LIVESTOCK is an approved European project funded by the European Commission within the Erasmus+ programme Partnerships in Vocational Education and Training. ERASMUS + EDUTRAINING DIGITAL LIVESTOCK involves young people in the achievement of new key competences as Precision Livestock Farming (PLF) and the Internet of Things (IoT) on livestock industry and farms. With a modern technological approach to animal farming, the ethical and environmental aspects need specialists with technical knowledge and skills in different farming systems able to assure efficient and modern farm animal management. The great potential of the PLF manager is increasing gradually by the farm industry with the objectives to maintain a good state of health of the livestock, with a good quality of the final product and to guarantee the protection of the environment and the safety of workers and animals. For these reasons, the introduction of the new technologies is a key tool for the employment of young people with concrete opportunities as emerging modern professions that reflect the importance of the efficiency and competitiveness also in the livestock industry and farms. ERASMUS + EDUTRAINING DIGITAL LIVESTOCK contributes to innovation in vocational education and training.

RESULTS

WHAT DOES THE RESULTS SAY?

We asked learners to answer a structured satisfaction survey on the perceived quality of the course, the web platform, access to online classes, tutoring services, difficulty of the final test. This survey allows the possibility to evaluate their appreciation on the efficiency of management and the quality of the delivered training package. Evaluation questionnaires were collected by email ensuring reliability and validity. It was found that 62% of the learners knew the Erasmus + Programme and 23% already had an Erasmus + experience. 100% of the learners found the course interesting to their future profession and they found the topics of the training package satisfactory. We are proud to register that 100% found the tutoring service efficient and available at all times; 92% had easy access to online classes without any technical problems. 29% used their smartphones to follow the online lessons, 29% used their desktops at home, 24% used their notebooks and only 18% used their tablets. 86% of respondents confirmed their interest in participating again in ERASMUS+ projects.
